Summary

With 10+ years of extensive experience as a full-stack developer, I bring expertise in both front-end and back-end technologies. I excel in building responsive user interfaces using HTML, CSS, and JavaScript frameworks, while also developing robust server-side applications and APIs with frameworks like Node.js or Django. My strong problem-solving abilities enable me to troubleshoot issues across the stack, and I am well-versed in the software development life-cycle. Continuously learning and staying updated with new technologies, I effectively communicate and collaborate with cross-functional teams, contributing to all stages of web development projects from conception to deployment.

Experience

Full Stack Developer

Intuit

Apr 2021 - Jan 2024

Implemented front-end frameworks such as React.js and Angular to enhance user experience and improve performance.

Designed and optimized back-end systems using Node.js, Express.js, and MongoDB to handle large volumes of data.

Integrated AI and machine learning algorithms into applications to provide personalized recommendations and predictive analytics.

Collaborated with cross-functional teams to deliver projects on time and within budget.

Full Stack Developer

HashiCorp

Aug 2017 - Mar 2021

Collaborated with UX/UI designers to implement visually appealing and intuitive interfaces, enhancing overall user satisfaction and usability.

Implemented RESTful APIs to facilitate seamless communication between front-end and back-end systems, improving system efficiency.

Conducted performance optimizations, reducing page load times by 20% and enhancing overall application responsiveness.

Mentored junior developers in best practices, code reviews, and emerging technologies, contributing to a more skilled and cohesive development team.

Participated in code reviews, testing, and debugging to ensure high-quality software delivery.

Frontend Developer

DoorDash

Sep 2013 - Jul 2017

Implemented RESTful APIs using Node.js and Express.js, facilitating seamless communication between front-end and back-end systems.

Collaborated closely with UX/UI designers to create intuitive and visually appealing user interfaces, resulting in enhanced user engagement and satisfaction.

Utilized cloud services such as AWS Lambda and Azure Functions to develop serverless applications, improving scalability and reducing infrastructure costs.

Actively participated in the tech community by attending conferences, contributing to open-source projects, and staying updated on the latest trends and technologies in web development and AI.

Education

Chapman University

Bachelor of Science - BS, Computer Science
Sep 2009 - Aug 2013

Skills

Front-End Skills
ReactJS, NextJS, Angular, Vue, HTML5, CSS3, JavaScript, ES2015-2019, Bootstrap, TailwindCSS, Material-UI, AntDesign, Responsive Web Design

Back-End Skills:
NodeJS, ExpressJS, FeatherJS, NestJS, Django, Spring Boot, Laravel, PHP

Databases:
MySQL, MongoDB, PostgreSQL, Oracle

API Integration:
RESTful API, GraphQL

Programming Languages:
C, C++, Java, C#

Scripting Languages:
JavaScript, TypeScript, Python

Version Control Systems:
Git, GitHub

DevOps Skills:
Docker, Kubernates, CI/CD

Web Security Practices

Agile Software Development
